

## Sensolus – Finance Manager

### Finance Manager – Ghent Tech Scale-Up

Are you an **experienced Finance Manager** who thrives on constant improvements, collaboration and taking ownership? Does the idea of working in a scaling environment **in the tech (IoT) sector** excite you?

If so, we are looking for you! At Sensolus, you will not only make a significant **impact** but also have the ability to foster your own **professional growth**. You will play a crucial role in shaping our financial operations and driving our success.

#### Here is what you can expect in this role:

As Finance Manager at Sensolus, you will take full ownership of our financial operations and play a very **hands-on operational role in BEGAAP accounting and tax compliance**, accurate **monthly reporting** and sound **cash management**. You will also act as a key sparring partner and **right hand to the CFO**, where strategic financial insights and a continuous drive for improvement are essential to support our dynamic, scaling environment.

**Coaching and leading** our Finance Accountant and building out a finance team in line with our company growth will be the cherry on top of your endeavours.

*Here is what you can expect in this role:*

- Taking on an operational role, with full **ownership** of the key **end-to-end financial processes**: accounting, consolidation, tax, controlling and reporting.
- Ensuring full **compliance** with Belgian legal, tax, and accounting requirements. You will roll up your sleeves and get it done! For example:
  - o monthly closings and financial reports,
  - o monthly VAT returns & other legal filings
  - o complying with corporate income taxes, annual accounts, transfer pricing obligations, etc.
- Managing the **day-to-day tasks** (international accounting, payments, budgets, forecasts, cost control) is just as important to you as the bigger strategic projects.
- **Liaising** with external accountants, tax consultants, auditors, banks, and subsidy agencies alike is no challenge for you as you are a natural communicator.
- Identifying and implementing **process improvements** (ex. automation of KPI reporting, accounting & invoicing flows) is rewarding to you.
- You will help with fleet, expense management, insurances and subsidies.
- You see the bigger picture and partake in **strategic discussions** with the CFO, with financial planning and business modelling skills to back it up.

#### You'd fit in well if you:

- Have a minimum of **6 years** of relevant experience in internal finance operations, ideally including time spent in a scaling or international environment. Additional background in audit or consulting is a plus.
- Have hands-on (operational) experience with **BEGAAP A-Z accounting** (knowledge on IFRS a plus) and **tax regulations**, as well as financial **consolidation** in international settings.

- Have hands-on experience with VAT returns, corporate tax declarations, and Belgian annual reporting obligations.
- Are an ambitious, communicative teamplayer, ready to dive into the details, yet capable of stepping back to see the bigger picture.
- Are pragmatic, solution-oriented, and comfortable with working in a fast-paced environment. You like to bring a good balance between a hands-on **operational** execution and **strategic** big picture thinking.
- You take great pride in your eye for detail and analytical mindset.
- Affinity and experience with the tech industry and SaaS/PaaS offerings.
- Communicate fluently in both **Dutch and English**.
- Are proficient with accounting tools, Excel, and preferably reporting software. Having worked with ExactOnline and TeamLeader is a bonus.

## What do we offer?

A competitive salary package in line with your experience

Attractive benefits such as meal vouchers, health insurance and a cafeteria plan

Enjoy up to 32 days of annual leave and flexible working hours, giving you the freedom to manage your own schedule
